## \$25,000 WORTH CHINESE PASS THROUGH CARSELAND

Twenty five thousand five hundred dollars worth of Chinese—men, women and children—passed through Carseland on the C.P.R. They will not stay long on Canadian soil. They were all in bond and under guard. Some of the fifty-one were bound for Boston; four Chinese women, the only women in the party, were travelling in Kamata where their husbands are in business and some of the younger men were returning to Newfoundland after a holiday trip to China. None of them will be allowed to land in Canada.

The \$25,000 valuation is based on the \$50 head tax that Canada places on each Chinese immigrant, but as a matter of fact none of these would be permitted to enter Canada even if they tendered the head tax, owing to the refusal of the Ottawa authorities to allow any more of the Chinese of the laboring or the merchant classes to enter Canada.

The party landed a short time ago at Vancouver from the C.P.R. Pacific liner "Empress of Canada" and consisted of three cars which they and their belongings occupied formed a portion of No. 1 section of No. 2, the Imperial Limited.

According to Special Guard James Houghton, in charge of the party, the Chinese show little interest in the sympathy with each other. One man was short of food because his packages had been held back by the Vancouver Customs officials, who will forward them by rail train to Montreal. A well-to-do Chinese of the merchant class who had abundant food with him was asked by one of the guards if he would divide up a portion of his abundance with the man who was short of food.

"No! I do not know him," was the cold answer. Had it not been for the white railroad guards the unfortunate Chinese would have had very little to eat on his trip across Canada.

### DUCK SHOOTING SEASON OPENS SEPTEMBER 15

The opening date for the shooting of ducks, geese, coots and Wilson's or jack snipe in Southern Alberta, is set for Saturday, September 15.

The daily bag limit is as follows: Ducks, 30 per day and not more than 200 of all kinds in the season; geese, 15; coots, 25; snipe, 25.

There is a closed season on all other migratory, non-game and insectivorous birds. There is also a closed season this year on partridge and quail.

The open season for Hunsaria partridge is from October 1 to November 30. The bag limit is 15 per day and 75 per season.

### LOOKING CONFIDENTLY FOR RUST RESISTING WHEAT

WINNIPEG, Man.—"We are holding our breath," remarks L. N. Newman, the Dominion cerealist, who is in the West, the expectation referring to the development of a grade of wheat that will be rust resistant. Mr. Newman is looking into the situation of the "Red" wheat, which is not rust proof but grows so quickly as to mature before the rust season develops with the humid weather. This year the "Red" wheat has been sown on 200 acres of experimental farms, while 400 farmers are growing it from limited samples distributed among them. The result so far is stated to be most encouraging.

## SAUNDERS-FORSTER WEDDING TOOK PLACE AT CALGARY

A pretty wedding took place at 7 p.m. Wednesday, August 15th, at Crescent Heights United Church, Calgary, when Irma Ruth Forster, of Irvine, became the bride of William James Saunders, of Strathmore. Rev. Herbert E. Gordon officiated.

The bride was charming in a gown of white crepe de chine with blue velvet train, blue and white rimonettes and veil trimmed with orange blossoms. She carried a bouquet of butterfly roses.

Miss Mary Price and Isabel Longmate, cousins of the bride, were bridesmaids. They were daintily frocked in pale yellow georgette, wearing white hats and carrying pale pink carnations.

Helen Forster, sister of the bride, made a dainty flower girl, wearing a pale green frock. She carried a basket of white roses.

Mr. Orval Forster, brother of the bride, was the best man.

Mr. J. P. Austin played the wedding march.

During the signing of the register, Miss Christie Austin sang "A Dawn in June."

Mr. James Edgar and Gordon Forster ushered the guests to their places.

After the ceremony a reception was given at the Tea Kettle Inn, the guests present were: Mr. and Mrs. Wm. Saunders, Mr. and Mrs. James Saunders, Mrs. J. Forster, Mr. and Mrs. C. Forster, Mrs. Charles Longmate, Miss Mary Price, Mr. Orval Forster, Mr. and Mrs. J. Barclay, Mr. James Edgar, Mr. Bob Miller, Mr. Gordon Forster, Mr. Richard Lyle, Miss Mary Stockton, Miss Helma Fleming, Mr. Fred Jones, Miss Helen Forster, and the bridesmaids.

The groom's gift to the bride was a travelling set to the bridesmaids and flower girls, stunner of pearls; to the best man a tie pin.

Mr. and Mrs. Saunders left the following day for Banff and points west via Kootenay, Kettle Valley, and Crownsett. They will reside at Strathmore.

## EIGHTH ALBERTA GOVERNMENT CROP REPORT FAVORABLE

The Provincial Government reports dry broken weather during the first two weeks in August retarded the ripening of crops and delayed harvesting a few days. The warm weather of the past ten days has, however, been beneficial in drying the grain for cutting, and in ripening the late grains, and cutting is now general over the entire province. The Peace River country reports 75% of cutting done and threshing expected to be general by next week. Central and southern parts of the province report 25 to 50% of cutting done. Very little threshing has been done in the province to date and no estimate can be made at the present time of the yield of the different grains. We do not anticipate, however, any increase in local wheat over that of 1927. The quality of the grain being harvested throughout the province is good.

Frosts have occurred in almost all parts of the province, but these have been confined to small areas and the average percentage of damage from frost for the province will be small, not more than 10% at the most. Hail damage has been heavy also in a few districts, but the average for the province will be less than last year. The percentage is estimated to be approximately 14% of the insured acreage as against 17% last year. The crop in general has been singularly free from disease and insect pests.

Labor appears to be plentiful throughout the province, wages running from \$3.50 to \$4.50 per day. Threshing machines and combines are being used more generally in the province than was the case last year and harvesting should go forward rapidly.

The average sown to wheat will be less than estimated at the beginning of the season owing to the dry weather at seed sowing time. This land, however, was sown to coarse grains and the total acreage of the province is approximately the same as estimated.

The Dominion Department of Agriculture keeps a watchful eye over the production, marketing, storing and reselling of this enormous volume of food products amounting to 2,310,751,569 pounds or well over a million tons.

### DIME TAXI ENTERS RACE FOR PATRONS

WASHINGTON—Now comes the latest taxi. One hundred taxicabs, advertising a dime fare, are to take up stands at 12 places throughout the city prepared to compete for the over-haul transportation business among the thousands of government chauffeurs.

The two traction companies and the leading bus concern of the capital have filed protests against the move with the Public Utilities Commission.

The commission has concluded that for a cab to transport five passengers at ten cents each between two stations constitutes a public utility and that such service cannot be started without formal application to the commission, a public hearing, and official granting of permission.

The cabs will run only for one hour after 9 o'clock and will take down their 10-cent signs and resume their normal business.

### TORONTO'S BIG SWIMMING RACE

TORONTO, Sept. 5.—No one finished in the big race today. The Frenchman was leading.

### WIFE CHARGES MAN SODA POP ADDICT

SAN DIEGO—Addiction to drink—soft drink—was the unusual ground for divorce filed by Florence M. Bradley, in a complaint filed here today against William H. Bradley. Mrs. Bradley claims her better half is a popular "soda fountain" house.

## STRATHMORE TOWN COUNCIL HELD A REGULAR MEETING

FRED J. ANDERSON, who is the first candidate to be nominated for the next general election to the House of Commons. He has been chosen by the Liberals of Strathmore County, Quebec, as their standard-bearer.

### CANADA EATS MILLION TONS IN 12 MONTHS

One egg one and a quarter ounces of butter, a seventh of an ounce of cheese, three ounces of beef three and a half ounces of pork, one ounce of an ounce of mutton and lamb, and one-eighth of an ounce of poultry is the daily ration of these products for every man, woman and child in the Dominion. In other words, Canadians consume in a year 3,588,888,304 eggs, 27,888,136 pounds of butter, 21,272,125 pounds of cheese, 61,424,825 pounds of beef, 77,150,815 pounds of pork, 58,191,717 pounds of mutton and lamb, and 22,222,019 pounds of poultry. On a per capita basis this amounts to eggs 29.67 dozens, butter 28.88 pounds, cheese 2.38 pounds, beef 6.69 pounds, pork 8.45 pounds mutton and lamb 6.11 pounds, and poultry 6.96 pounds.

The Dominion Department of Agriculture keeps a watchful eye over the production, marketing, storing and reselling of this enormous volume of food products amounting to 2,310,751,569 pounds or well over a million tons.

### Coming Events

A meeting of the Strathmore School Fair will be held in the High School building on Thursday, September 6. This may be the last meeting before the exhibition, hence it is imperative that all interested attend.

Ye Olde English Faire, Wednesday, September 19th, Strathmore. 28-3

Hirtle's Theatre, Friday and Saturday, August 31 and September 1, Garry Cooper in "Beau Sabreur"; Tuesday, September 4th, "The Pioneer Scout".

V. C. Chapman, of Haintree, will hold an auction sale just as soon as harvest is over.

Ye Olde English Faire, Strathmore, Wednesday, September 19th. Supper will be served by St. Michael's Guild from 5 to 7. Come!

Hirtle's Theatre, Friday and Saturday, September 7th and 8th, "Persepolis"; Tuesday, September 11th, "The Pioneer Scout".

WIFE CHARGES MAN SODA POP ADDICT

SAN DIEGO—Addiction to drink—soft drink—was the unusual ground for divorce filed by Florence M. Bradley, in a complaint filed here today against William H. Bradley. Mrs. Bradley claims her better half is a popular "soda fountain" house.

LORD LOYAT, well-known British nobleman, who has arrived in Canada to discuss with the Federal Government the plan for settling over 20,000 miners and their dependents.

### BUTCHER LEAVES PECULIAR REQUEST AT CLEVELAND

CLEVELAND, O.—Cleveland has been willed a \$200,000 trust fund for charity by a butcher who sold meats from a little stand in the Central Market House for 50 years, but later on, when he figured that it might be the year 2178 before the poor receive the white income from the fund.

Fred R. Kalls the butcher, who died at the age of 64, left \$200,000 in trust, with orders to build it to \$200,000, according to the terms of his will filed in Probate Court.

Until it arrives at that goal, a part of each year's income will go to needy persons to be selected by the Charity Board of the Ellis Lodge here, and the rest of the principal account for investment in United States Government bonds.

When the fund finally gets to the \$200,000 mark, and that may take about 250 years, the whole of each year's income will go to charity.

### DOG HAS 34 PUPS IN YEAR; 30 LIVE

THOMASVILLE, Ga.—High-product model for the pet owner comes from the pointer dog of Ralph Gadenrath, of Cody, 25 miles below Thomasville. This dog has given birth to 34 puppies in a period of slightly less than 12 months.

The mortality rate, too, is low. 30 of the dogs surviving all the time the puppyhood is here to, and developing into a healthy and active juvenile stage.

### SCHOOL FAIRS

Langdon School Fair will be held on Tuesday, September 11th.

Keoma-Kathryn School Fair will be held on September 14th and 15th.

Standard School Fair will be held on Wednesday, September 19.

Carseland School Fair will be held on September 25th.

Strathmore School Fair will be held on September 25th.

## UNITED ELECTRIC SUPPLIES KANANASKIS JUICE

On Saturday, the United Electric Company, which has the contract with Strathmore to furnish light and power, hooked up with the Calgary Power Co., via Rockyford, and turned in the juice of Kananaskis. This item of news is really more important than the simple information it conveys.

The people of Strathmore were delighted when they received power from the Bassano dam, but from time to time the consumers' patience has been taxed, caused by numerous interruptions in the service, which, unfortunately, usually happened on a Saturday night, creating no end of trouble for the merchants and business men, not to mention the troubles of the housewives, who were more or less unprepared each time it happened.

Everyone met the conditions fairly good naturally, being satisfied that Jack Allen, and his staff were doing everything possible to furnish the best service able to, and at all times, were prepared to give most logical explanation for the cause of the trouble.

The company have had plans completed for some time to connect with the Calgary Power Co., which would give them a position to furnish a much improved service, second only to plants from which duplicate lines are available.

The consumers hope, notwithstanding the interruption on Monday night, to now be rewarded for their patience by receiving an excellent, continuous service.

The new connection was made on Saturday, and immediately following the juice being hooked up, an exceedingly brilliant light was produced, one light being equal to the equal of two previously furnished, a most acceptable change, especially at this season of the year when the season is approaching when good lights are needed so many extra hours. A further pleasure that may be anticipated, is that the company will probably be able to make the juice being hooked up, in the month of October, thus giving the consumers a better light, a better service, and a better rate. What better could you ask? Thank you!

## SPORT NOTES

"BABE" RUTH DWARFS  
ALL IN POPULARITY

Just after New York had finished making four straight games in the Pittsburgh Pirates last Fall in the World Series, typewriters all over the nation began clicking out tales that dubbed the Yankees the greatest ball team of our time.

Literary bouquets showered at the feet of Babe Ruth and Miller Huggins and all members of the team came in for a share of the praise. But it was the Babe who reaped the lion's share of the glory.

It probably will be that way so long as Ruth patrols right field and keeps flaming his homers. His remarkable baseball feats are overshadowing some of the greatest baseball players who ever stepped on the diamond.

Bob Meusel is a star and has been for years, but because his lustre is a trifle less than that of Ruth, he gets scant attention when baseball fans gather to win and lose pennants in the Hot Shoe League.

Meusel is a Star  
Meusel has one of the most accurate and powerful throwing arms in the game, he covers the outfield like a blanket and can hit with the best of them. On any other team except the Yankees, he would be the idol of the baseball public.

Then there is the case of Lou Gehrig, the slugging first baseman, who stepped from the Columbia University diamond to Yankee Stadium and has been there ever since. Gehrig hit a lot about his head last year and for a time threatened little Jimmy Ryan, King of Clout. He had the flurry of nationwide publicity then and got a fat contract for this year. But now that Lou has settled down to his normal pace, Ruth again reigns supreme.

His injuries this year have not prevented Tony Lazzeri from being a bulwark for the Yankees on both defense and attack. The second baseman is hitting .360 clip and may soon be leading his position with all the old warbirds. Lazzeri is the spark plug of the Yankee infield; he provides the dash and fire that makes it one of the strongest line-up defenses in the American League.

Combs Also Shines  
Earl Combs, the slick center fielder, ranks among the great loafers of the game. Ball players swear that Combs is the hardest man in the game to pitch to. He has a peculiar crouch at the plate that makes it impossible for the opposition to play him. Combs is a right-hander, left to right, left to centre field or even clear out of the lot. His batting average is around .324 and he is as fast as a deer.

The list could go on. Koenig is a brilliant shortstop when Lazzeri is second. He is a real playmaker. He can still play ball with the best of them; Pennock, Hoyt and Piperno would look good on any team.

But the master who is leading the game boys play, they still find themselves in the shadow of the mighty Babe. The popularity of the great slugger is far greater than that of Ty Cobb in the days when the Georgian was burning up the base paths, and causing grey streaks to creep into the hair of the managers of the seven other teams in the American League. The secret of Ruth's popularity can be explained by quoting a prominent fan who said:

"I would rather see that guy strike out than watch Gehrig hit a home."

GENE TUNNEY WINS  
HARDEST FIGHT OF ALL

NEW YORK.—The winning of Mary Josephine Tunney was Gene Tunney's hardest fight. The popular boxer has won more than that of Ty Cobb in the days when the Georgian was burning up the base paths, and causing grey streaks to creep into the hair of the managers of the seven other teams in the American League. The secret of Ruth's popularity can be explained by quoting a prominent fan who said:

"I would rather see that guy strike out than watch Gehrig hit a home."

His One Ideal  
Since the day Tunney was introduced to her—five years ago, when she was 16—I believe he has had but one ideal—to make her his wife. I know of no other girl in whom he ever expressed the slightest interest.

Though a girl with such a secure social position that she could forget it completely, Miss Lauder never has cared for society. I am sure she never has been interested in any man but Gene.

Her parents never opposed the match. They like Tunney, as has every one who knows him well, and they have all sorts of respect and regard for him. She never has seen Tunney box.

But I am sure that she was not responsible for his leaving the ring. She is too good a sports-woman not to appreciate the skill involved in boxing.

Friends of Wilder  
She, however, never thinks of him as the fighter, but as himself. Gene never discusses boxing with his friends.

Miss Lauder shares Gene's friendship with Thornton Wilder, the author, and the three have spent much time together in the out-of-doors in and around Greenwich.

Tunney is an excellent dancer, and so is Miss Lauder, but I believe he never has taken her to a dance. They even may never have danced together. Neither is fond of "society" or the pursuits of the purely social set.

Gene and Mary were introduced very casually at some informal occasion or other. Gene was not famous then, but he was rich. He probably had less than \$50,000. But he was a little, impressive young fellow.

Everybody knows how he won his place in the boxing world. While he was winning it, a lot of people jeered him because of his aloofness from the ordinary passions of the crowd. They didn't think his attitude and actions could be genuine. But they were. I guess Mary was one of the few who realized this.

The house Gene bought near Stamford, some two years ago, is more than 200 years old, and is a little gem of Colonial architecture. Gene saw one day as he was mooring to Waterbury, and bought it the next.

Realized His Dream  
Under the stars, Miss Lauder would share this home with him, but they were not engaged at that time. The house has old Dutch ovens and a great many other things, but they were not engaged at that time. The house has old Dutch ovens and a great many other things, but they were not engaged at that time.

Gene has become greatly interested in old houses and old furniture, and has been studying their relationship for the past two years so that he is very well informed on these subjects now.

They'll Live Simply  
With only seven rooms, they cannot have a large establishment. They think they will live very simply and without luxuries. But I am sure they will have several horses and plenty of dogs.

Just what Tunney will do, I am sure, he does not know himself. He has several good offers in various lines of business. I think he will take the one that is most interesting to him.

I believe this is a really splendid plan, between two very fine, very well-matched people. I see no reason why it should not be successful. I have a book business that is, to say, they are living happily ever afterwards.

COFFROTH HANDICAP  
RICHER THAN EVER

With \$100,000 added money, an increase of \$15,000 over last season, making an estimated gross value of approximately \$150,000, the announcement is made by James Wood Coffroth, President of the Tijuana Jockey Club, that the world's richest race, the Coffroth Handicap, will be run next March 17. It will be the tenth renewal of the classic. The distance is one mile and a quarter, and the conditions call for 3-year-olds and upward. The announcement comes from Mr. Coffroth coincident with the opening of the stakes season at the coming season at Tijuana, which, in accordance with recent custom, starts Thanksgiving Day and runs for 100 or more racing days.

The owner of the winning horse will be guaranteed \$75,000 and all entrance and starting fees, except \$5,000, third, \$4,500, and fourth, \$1,500. The entrance and starting fees bring the Coffroth up to a gross value of approximately \$150,000. Two additional features of the race provide that the winning jockey receive \$5,000 and the winning trainer \$5,000, an increase of \$2,500 each over last season.

HERE'S WOMAN WHO'S  
NOT AFRAID OF RATS  
LONDON.—Miss H. Henderson Smith is one woman in a million who works in a place infested with rats—and likes 'em. She plays nurse, to 500 rats, brown and white, and 500 mice. The animals are used by scientists in experiments.

## Immigration a Vital Issue

Immigration is by far the most important political question before Canada today. Besides it all other current issues, such as the St. Lawrence waterways development, pale into insignificance. In all purely national matters the mistakes of today, however great, can be rectified in the next or succeeding generation. But the fundamental consideration on which the greatness of a nation depends is the nature and character of its population. Development of Canada's vast resources requires a vastly increased number of Canadians. Immigration thus becomes necessary.

The work which we, the present generations of Canadians, do in this regard, can never be undone. If the foundation stone of the vast Canadian population of the future is inferior in any respect, Canada, the Empire, and the world, will suffer for all time. How great, therefore, is the responsibility which we owe to a beneficent Providence, who entrusted this wealth of resources to our ancestors, who worked and suffered to lay its foundations, and to our sixty thousand comrades who have taken their lives to preserve its honour and freedom.

From the economic point of view the accepted principle governing our immigration policy for many years has been to encourage and assist, in coming to our shores, only agricultural workers and domestic servants. The basis of this policy was the belief that by accident or design, this second policy has been departed from in the past few years. Many immigrants from central and south-east Europe are arriving who never did agricultural work in their own countries, and many more, still less so, are coming from the East. These immigrants are found engaged in, or seeking work in, any other than an agricultural career. During the winter months, butch and meat markets are flooded with the carcasses of these immigrants, who are not of the same quality as those who have been in our country for many years.

Gene has become greatly interested in old houses and old furniture, and has been studying their relationship for the past two years so that he is very well informed on these subjects now.

They'll Live Simply  
With only seven rooms, they cannot have a large establishment. They think they will live very simply and without luxuries. But I am sure they will have several horses and plenty of dogs.

Just what Tunney will do, I am sure, he does not know himself. He has several good offers in various lines of business. I think he will take the one that is most interesting to him.

I believe this is a really splendid plan, between two very fine, very well-matched people. I see no reason why it should not be successful. I have a book business that is, to say, they are living happily ever afterwards.

ring the United States from Canada must be native born Canadians. It clearly follows that all that our present immigration policy is accomplishing is the supplanting of our own people in our land by imported foreigners. Under these circumstances young Canadians can hardly be blamed for going to live in a country where, whatever its fault may be, at all events, has enough national common sense to protect the standard of living of its own people by restricting immigration attempting to lower it. It is order to have an abundance of cheap manual labour.

But far more important than the economic side of the question is the broader national side. Canada is a country of dual race and language; in fact, it may be a great nation, but we cannot have any national cohesion if we have an indefinite number of races and languages. The old cry, of course, goes up that an unlimited number of foreigners can be assimilated in the next generation. How? In fact, it is a great question. We can assimilate them, but we cannot have any national cohesion if we have an indefinite number of races and languages. All White Cups and Saucers, per dozen 85c

Clover Leaf Cups and Saucers. Regular per dozen \$1.80, for \$1.35

## I Saw Last Week

REXALL RED out without a permit on Labor Day, but conditionally that he remains with his chapter, Jim Cannon, who certainly carried an anxious look. IAN MCKENZIE meeting No. 3 train on Labor Day, but he didn't care if it was late or not, yet he didn't. FRID J. DUNN reporting that all this talk about a new arrival of vines in town was spurious, and that the only up-to-the-minute silver-tongued, genuine vines may be seen at the corner of Sixth Street and Third Avenue. DICK LILLY getting all doped up at the barber shop before leaving for Banff. BOBBY HAMBY reporting that the High River fishing trip was a genuine success, notwithstanding the uncalculated remarks of one James V. Moran, the fisherman with the elastic upper lip. BILL SAUNDERS informing Casey Nering that he had no idea this married man had so many household chores to perform, but not to be discouraged, but to go ahead with his distinguished plans just the same. BEVY CHAMBERLAIN telling a fellow that he had completed a half day's work before leaving home at 9 a.m. LECTOR MCGREGOR carefully and conscientiously performing on Sunday night some of the pleasant duties that fall in the way of the secretary-treasurer of a school board, and Mrs. McGregor was not present—in the words of "Pat", she had better keep an eye on that "bird". BILL MATTHEWS proudly producing two fine looking babies claiming that they are twins, and that in a short time that Fred J. Dunn will be the most jealous man in town when he sees how beautiful these new babies are. JACOB GREEN and MICHAEL MORAN, two of the most admired leaders at Chesterners Lake. TED SCHULTE delighted on Saturday when the United Electric Company turned on the juice via Rockyford, and produced a real honest-to-goodness electric light. BILL SAUNDERS telling his father about meeting a man from the Isle of Wight at the Trail Smelter. GEO. QUINN reducing the number of his trips to Calgary. Strathmore never looked better to him. REVEE H. B. CHAMBERLAIN, Harry Ackerman and Bob Gray holding a cordial reception on Third Street. JOHN VERNON sporting the Dutch colors on Friday in honor of Queen Wilhelmina's 6th birthday, and refusing permission to Trotsky to also celebrate, as he never could be a real Dutchman. MAYOR A. SHIMPTON extending great hospitality to Mayor Bock of Nanaka, and expressing their opinions about the grade of some wheat exhibited by F. A. Cett and Fred was a very strong opinion. J. W. BISHOP looking very stony driving away at 7 a.m., with a very nice chauffeur.

Does that is slipping one over on "Dad" White, eh, BILL MATTHEWS some some fast footwork upon his return from Calgary on Thursday night. THE BERRY GIRLS making arrangements for a new Beauty Parlor. REV. T. B. WINTER keeping himself busy arranging his performers for the "Ode Knappe Fair" in Lambert Park on Wednesday, September 19th. Everyone should be present and see Joe. French arranging matters for "Sally Ann". BILL SAUNDERS telling "Zed" McKeeble that he never knew how much work a married man had to do around a house. "Guss" "The" Saunders did a lot that Bill did not notice, and Red agrees with Bill. JOHN, the Bulgarian sporting a very old new shirt, quite to the disgust of every Pacific, a very quiet gentleman, who strongly protests about young men being so very conspicuous. GEORGE DE PUE, of Rossford in town, receiving an interesting discourse about Milton, Tennessee and Shakespeare. "PAT" HOOLEY, of Corral, relating crop results in that district to "Dad" White and Homer Nelson, and each time he told it the returns grew larger, and to earn were the statements that Homer at most wished he was back in Corral. FLANK SKEALES taking a sun bath on Labor Day, picking up a beautiful fan that would make a real cream cracker.

## UNITED STATES TAXES CANADIAN HOLDERS' DIVIDENDS

OTTAWA—Complaints which were lodged here against the action of the United States Government in having denied the right of dividend of Canadian holders of United States securities an amount equal to the Federal tax imposed by the Washington Government, are being supplemented constantly with some suggestion of retaliation, which is not a reliable procedure. It appears that the United States tax on dividends of American companies or other securities held in Canada, or any outside country, is not a new ordinance, but rather, its enforcement is new. In several instances of late there has been evidence of the United States revenue officers becoming especially active this year, and exploiting some sources of taxation which heretofore have been more or less inactive. The election may have something to do with it. Matter of Millions In the case in point it may be a matter of millions, depending upon the extent to which United States securities are held in Canada. The banks through which payment is made hold back 5 per cent. to cover the United States tax. Any residue is handed over to the bondholder in the final adjustment.

Having regard to the millions of American money invested in Canada in industrial enterprises, war loans, railway bonds and other securities, a similar policy, applied here, might not be effectively offset the impact by Washington which is now complained of. As stated, however, retaliation is not viewed with favor, nor is likely to encourage the influx of American money which proves helpful in Canadian development.

Agreement is Expected What is more likely is that an arrangement will be sought in that manner similar to the negotiations recently outlined and now in progress between Ottawa and Washington regarding the taxation of steamship companies located in one country but doing an international business. The proposed method of doing away with duplicate taxation is an agreement that in which over country the company is headquartered, it shall pay its taxation requirements of foreign ramifications. If such a principle is applied and extended to the United States would not see Canadian security holders, while there would be no room for the present suggestion that Canada should apply to American holders of stocks and bonds taxation on their dividends arising from Canadian sources.

## WONDERFUL NEW ENGINE FOR C. P. R.

MONTREAL—The latest passenger locomotive in the British Empire recently emerged from the Angus shops under their own steam, and close to 5,000 employees most of whom contributed something to her creation, stood to cheer as she thronged gently upon for the first time and she moved slowly forward. She is a triumph of Canadian design and engineering craftsmanship, a graceful mechanism, nearly one hundred feet long with a tractive effort of 60,000 pounds, equal to 2,683 horse power. The new K-1A class locomotive has been built from designs originated in the motive power department of the Canadian Pacific Railway in the company's own shops by its own employees. Two of these engines have been constructed and they will first be operated on the Montreal-Toronto run. Although its weight, 451,000 pounds is greater than that of any other passenger engine in Canada, the extensive use of Canadian nickel steel has reduced it to a minimum, and the high ratio of tractive power to weight is a notable feature of the new engine. Other features are a one-piece cast steel locomotive bed, a tender with a water bottom under frame, boiler pressure of 275 pounds, the highest of any locomotive in Canada, and a length of engine and tender of 97 feet 5 inches. There are eight pairs of wheels, a four-wheel leading truck, eight drivers, and a four-wheel trailing truck. The drive wheels have

a diameter of 75 inches, and the cast nickel-steel cylinders are 25 1/2 inches by 20. Coal capacity is 18 1/2 tons, and water capacity 12,000 imperial gallons. A mechanical stoker could easily lighten the duties of the fireman.

The new design aimed at largely increased power, reduction of weight and elimination of parts. The result shows that Canadian technical skill and workmanship is equal to the task of putting a fully-equipped engine of the best type under its own power, and that the Canadian Pacific Angus shops, the second largest on the continent, are capable of doing successfully with recognized engine-building plants anywhere in the world.

## PRESIDENT BEATTY STARTS LONG TOUR OF WEST

MONTREAL, Que.—In company with a party of Canadian Pacific directors and a number of leading business men, E. W. Beatty, chairman and president of the Canadian Pacific, left Montreal for an extended tour of the company's western lines. The party will consist of Mr. E. W. Beatty, the following directors of the company: Sir Herbert Holt, E. W. Molson, W. T. Tilley, K. C. Henry Cockburn, W. A. Black, James A. Richardson, Ross H. McMaster and Sir Charles Gordon, president of the Bank of Montreal. Mr. Beatty, general manager of the Banque Canadienne Nationale; Hon. Senator Stewart White, and Dr. W. W. Calver, Mr. A. D. Macleod, vice-president of the Canadian Pacific, will accompany the party as far as Fort William, and Mr. D. C. Coleman, vice-president, western lines, will accompany them through the west.

Back on the way west and on the return journey they will pass over parts of the line not usually visited on the annual tour of inspection, and every opportunity will be taken of seeing the country and gaining a first-hand acquaintance of its economic conditions. After visiting Victoria, the party will leave Vancouver for the east September 8, and will pay a visit of inspection to Lake Louise and Banff, arriving Calgary September 12. After a visit to Edmonton, four days will be spent in the Peace River country, travelling over the R.P. and B.C. Railway as far as Peace River Landing, arriving back in Edmonton on September 21, and at Montreal on the 23rd.

## CUSTOM DUTIES REMITTED UPON AMERICAN SHEEP

OTTAWA, Ont.—An order-in-council has been passed providing for the remission of customs duty on grade wool and purebred unregistered Rambouillet rams imported from the

United States during the period commencing September 1st and ending sufficient to meet the demand, and a November 30th. These sheep are in large quantity is available in the United States for breeding purposes, and the States for export. Similar action must conform to all regulations as to have been taken during the past few years on recommendation of the Minister of Agriculture. The supply of these later of Agriculture.

## See the New UTILITY TRUCK

## Built to Win Favor on Western Farms

EQUIPPED with the special grain body illustrated, the New Chevrolet Utility Truck is the ideal haulage unit for the Western Canadian farmer. It handles full loads with the greatest ease... enables you to cut down the time and expense of hauling, and offers dependable performance, even in heavy mud and sand. Practically every part of its chassis is oversize. Come in and see the new Chevrolet Utility Truck! You will find that it affords everything you could possibly want in a haulage unit of this capacity—unusual pulling power—remarkable performance—amazing handling ease—and outstanding economy of ownership and operation. Let us give you figures on its low maintenance costs.

TO "FOOT-PADDLE" BOAT  
ACROSS THE ATLANTIC  
CUXHAVEN, Ger.—Header and  
Hinsberg, the two able seamen who  
are attempting to cross the Atlantic in

a "bicycle boat," have left here for  
visions at Plymouth. They intend, if  
unsuccessful, to turn the Elbe  
River from Hamburg, and hoped to  
cross to America in 45 days.  
The men will ship water and pro-

## Indian Celebration At Banff

The day of the people when Indians of all  
tribes gathered for the celebration. Lower right—Squaw receiving  
her husband. Lower right—A group of Indian men standing  
in a line.

No section of Canada can claim a monopoly of  
Indian Summer, but to Banff, Alberta, belongs Indian  
Days. Indian Summer occurs in the fall and may last  
two or three weeks; Indian Days occur in July and  
are only three in number; but, for those for whom  
they are named, there is more real pleasure derived  
from them than from any other festival. For three  
other hundred and sixty-two days of the year,  
the Indians of the Banff area are busy with their  
work. For three days the Indian is "King of Banff."  
He pitches his camp under the steep cliffs of Cas-  
cade Mountain, known to the Indians from ancestral  
days as "Stoney Chief." Close to "Stoney Chief" and  
still known by its original name stands "Stoney  
Square." The latter, a pretty mountain, much  
smaller than its neighbor, but with an appealing  
feminine dignity all its own. The reason, then, for  
the Indian original choice of names is obvious to  
all.

For these three festival days the Indian is lord  
of all he surveys, and all through the village of Banff  
and in and around the famous Banff Springs Hotel  
the scene resembles a veritable monster Indian camp.  
The event that probably led to the adoption of  
Indian Days occurred in July 1925 when rail traffic  
both east and west of Banff was tied up for a period  
of ten days, as heavy rains had washed out the tracks  
in both directions. The Banff Springs Hotel, then  
in a small apartment, was crowded with guests who  
found their time well spent in the hotel.

The hotel manager at that time and Tom Wilson,  
the famous Rocky Mountain guide, then put their  
heads together and decided to invite up to the whole  
Stoney Indian Tribe from the Monty Reserve to  
make friends with the visitors.

What is today the main road to the hotel was on  
that occasion staked off as a race track, the winning  
post being placed at the hotel entrance. Every form  
of race and sport known to the Indians was held, in  
addition to many suggested by the white spectators.  
Although the visit of the Indians was a marvelous  
success, and it ultimately led to the establishment in  
1927 of an annual Indian Day, which in time grew  
into the continent-wide advertised Indian Days. The  
Indian village of a hundred tents is, as said before,  
located at the foot of Cascade Mountain for this  
festival, and is a spectacular in form, each band of the  
tribe having a section to themselves. Banners are  
erected directly the Indian village is in shape. The  
Government donates three buffalo annually to the  
Indians, and the first one of these is then shot by a  
game guardian and quickly cut up by the residents.  
So skilled and speedy are the few Indian hunters  
employed, that within thirty minutes after the shot  
is fired, there is not a vestige left of what was once  
a noble animal weighing approximately one ton.

## Local Jottings :-

George Venus has been visiting with  
Ben Essenden, and "tanning" with  
some old time ball players. George  
is now a resident of Ontario, and came  
west to visit his father, who is seri-  
ously ill at Hanna.

AM Carson, who has an automobile  
turn of mind, announced that he had  
bought for himself a 1927 Buick  
Violet base, 21 inches; lighting equip-  
ment, bright blue head lamps with  
automatic dimmers; frame, well bal-  
anced, strong, flexible, well reinforced;  
body, rubber mounting for safety,  
well insulated, will not rattle or  
squeak; finish, shell pink; horn, high  
frequency vibrator type—loudest when  
fuel tank is empty; top, well rounded  
and back, golden glin covering; fuel  
gravity feed, source tank, centrally  
located; clutch, easy slip type, positive  
release; improves with age; circula-  
ting system, self-cooling, well packed  
self contained; special equipment,  
kiddy-hoop, safety pins Q-tips, tal-  
cum and many standard extras.

Mr. Howard A. MacLean, son and  
daughter, and Mr. Emory, of Calgary,  
were in town on Labor Day.

Mrs. Parsons, of Medicine Hat, has  
been the guest of her cousin, Mrs.  
Wm. Saunders, with whom she spent  
a couple of days in Calgary this week.

Bob Arthur was in town on Satur-  
day, and reported that he was unfor-  
tunate at the London races, in losing  
one of his horses, which he has been  
specially caring for during the past  
year. The animal injured its leg so  
bad that it had to be destroyed.

Bill Mathers was a Calgary visitor  
on Thursday night, when he appeared  
before the Pension Board.

E. Conn Hind, Agricultural Editor of  
the Manitoba Free Press, after  
covering thousands of miles inspecting  
crop conditions in Western Canada  
writes: "So far as inspecting fields  
is concerned this is the end of a long  
trail and not since 1905 have I seen  
the west look so beautiful in its har-  
vest dress."

Miss E. McGowan, of Spokane, who  
has been visiting her sister, Mrs.  
Frank Skene, at Chadwick, returned  
on Saturday to resume her school work.  
Miss McGowan was accompanied by  
Miss May Skene, who will attend High  
School in Spokane.

P. W. Erickson, of Woodhill, Illi-  
nois, who is interested in land in the  
Chadwick district, was in town on Sat-  
urday, and delighted with the crop con-  
ditions. Mr. Erickson states that  
every one in Illinois is much inter-  
ested in the coming Presidential elec-  
tion, but he did not name the vic-  
toring candidate.

Bob Arthur received a number of  
pleasant notes from Calgary last week,  
which he liberated. He also has over  
twenty which he has raised this sum-  
mer, but these he is going to give to  
until next year, when they will be  
turned loose. Bob says the ones he  
has raised are beautiful birds, but  
just the same H. H. Patterson, jealous  
—real beauty.

Mr. Olson, of the Texaco Oil Co.,  
one of the largest independent oil  
companies in the world, was in town  
on Friday looking over the local oil  
fields with a view to opening a  
new oil station, supplying all their pro-  
ducts.

"Stubby" Gardner, who has been  
working in Edmonton, is returning to  
Calgary, where he will attend the  
Technical School during the winter  
months.

"Pet" Dekort is busy building a  
double garage for Mr. Geo. T. Berry.  
"Spunk" Sparrow, formerly a mem-  
ber of the Calgary Tiger Hockey Club,  
has been sold by Lloyd Turner, mas-  
ter of the Minneapolis team to  
Philadelphia. Just imagine "Spunk"  
having to play in the "City of the  
Dead." Poor old Spunk.

Ivan H. Holden, alias "Pat Hooley",  
Editor of the Central Recorder, one of  
Alberta's business weeklies, spent a  
day in Strathmore last week. "Pat"  
was in fine form and very jolly about  
the conditions in the Central dis-  
trict, for which in dry or wet seasons  
he is at all times a most enthusiastic  
booster for what he predicts will yet  
be proven as the real Garden of Eden.

Mr. and Mrs. Bill Mathers are re-  
ceiving congratulations upon the birth  
of a son on Friday morning.

At the Marchant Nursing Home, a  
son was born on September 4th, to  
Mr. and Mrs. W. C. Dillabaugh.

Miss Martin was the guest of Mrs.  
T. E. Wright for the week end.

Mrs. Scheer and her daughter, Ed-  
ith, of Calgary, were Strathmore  
visitors over the holiday.

The Ladies Aid of the United Church  
are arranging a supper to be served  
on the lawn at the home of Mr. and  
Mrs. Geo. Jones Friday, September  
th. Plan to be present.

Mr. Ross, of Toronto, with his  
daughter, Mrs. Baird, of Hamilton,  
Ontario, are the guests of the former's  
sister-in-law, Mrs. T. Chamberlain and  
Mr. Chamberlain.

Hector MacGregor Jr., is spending  
his vacation at Milk River.

Mr. and Mrs. Burnett, of Nanaimo,  
were guests of Mayor and Mrs.  
Shrimpton for the holiday.

Mrs. Patrick and Miss Phyllis Fos-  
bery, of Ottawa, are the guests of Mr.  
and Mrs. G. H. Patrick this week on  
their return trip to Ottawa. They  
will be accompanied east by Master  
George Patrick, who will enter school  
at Lakeside, Ontario.

Mrs. Sid Moore and daughter, Joyce,  
will arrive in Calgary this week after  
spending two months in Kalamazoo,  
Michigan, where Mrs. Moore studied  
art.

Mr. S. Bowser returned Tuesday from  
North Dakota, where he was called by  
the death of his mother.

Miss Jean MacGregor returned Sat-  
urday evening from a visit in Milk  
River.

School has re-opened, and the com-  
plete staff of teachers are again busy  
with the three R's and all the other  
subjects that a more complete curricu-  
lum requires.

Miss McQuinn and Miss Cranston  
are on pension at Mrs. Worling's home.

Mrs. Whitelaw and daughter, Ber-  
nice, returned Saturday last from  
Winnipeg, where they had spent the  
month.

Mrs. Slater left on Monday's train  
for a visit at the Coast.  
Mr. Joe French went to Vancouver  
last week to visit his brother, Mr.  
Douglas French, who is quite ill, and  
returned today.

A special meeting of the I.O.D.E.  
will be held in the Memorial Hall on  
Monday, September 10th, at 3 p.m.  
Mrs. H. Marshall, Province Presi-  
dent, will be present and give an ad-  
dress of interest to all I.O.D.E. mem-  
bers. Tea will be served. A large  
attendance is desired.

Mr. and Mrs. Lydiatt and family  
have returned from their holiday at  
the Coast.

Miss Sylvia Philpotts entertained  
her home a lovely house party, at  
George Park last Thursday. Cards  
and dancing were enjoyed, and a jolly  
evening was spent by all present.

Rev. Dr. MacGregor, who preached  
in United Church Sunday evening,  
held the closest attention of all  
through his most able sermon. Dr.  
MacGregor has been the guest of his  
sister, Mrs. Squire, of Chadwick.

Mrs. Van Tighem arranged two  
tables of Bridge in honor of her sister,  
Mrs. O'Brien Saturday evening. Some-  
very interesting games were played,  
the fortunate prize winner being the  
honour guest.

Miss Betty French returned Monday  
from Calgary, where she and her  
sister Josephine, had been guests of  
Mrs. E. L. Lane.

"Don" McKay is away on his vaca-  
tion, and reported to be spending it  
in Calgary, but up to the time of writ-  
ing to press, no one has been able to locate  
him in the Branch town.

Ed. Mitchell (nee Miss "Sam  
Scheer") has been spending the last  
two months in the South Sea Islands.  
She and her husband are with the  
Zane Gray party, and expect to re-  
turn there until Xmas, when they will  
return to their home in Los  
Angeles.

When the storm put the Calgary  
Power Line out of business on Monday  
night, the United Electric called for  
help from their first love at Bassano,  
and in a short time the service  
was resumed.

Miss Betty French invited a number  
of the younger circle Twenty evening  
to a party at her home, complimenting  
Master George Patrick. A very merry  
time was spent.

Rev. Canon Gale of Calgary, con-  
ducted the evening service in St.  
Michael & All Angels Church last  
Sunday.

Miss Judith Ross, of Victoria, is  
visiting her sister, the Mesdames  
Charles and Frederick Harvey.

## IMMIGRATION A VITAL ISSUE

(Continued from page 2)  
more, we will, each one of us, do ev-  
erything in our power to rectify the  
present state of affairs and to see that  
British and French people, as they are  
admitted to the number of immigrants  
admitted to our country.

We have often severely criticized the  
Senate of Canada in the past. It is  
therefore, only fair that we should  
express our appreciation of that body  
when it does what we can commend.  
Recent amendments to the Naturali-  
zation Act promised to place our west-  
ern provinces under the political con-  
trol of foreign immigrants, as they are  
already, so far as manual labour is  
concerned, largely under their economic  
control. These amendments  
were passed by the House of Com-  
mons, but the members of the Senate,  
—to their credit—rejected them. The  
amendments proposed to take away  
from our courts all jurisdiction in mat-  
ters of naturalization, and to give the  
Secretary of State at Ottawa full and  
exclusive power in the matter. No  
one has suggested that the courts, in  
dealing with applications for natural-  
ization, have not been guided solely by  
principles of justice. Why, then, the  
change. The only logical conclusion,  
of course, is that the advocates of the  
amendments did not want to limit the  
the deciding factor in granting  
or refusing the applications. To the  
honour of Alberta be it said  
that eleven of our sixteen mem-  
bers of Parliament opposed the  
amendments in the House. We re-  
joice, and we cannot forget that the re-  
sulting five new bill to support these  
pieces unjust and dangerous proposals.  
HUGH C. PARTING

## SILVER PRODUCTION WORTH \$12,816,677

OTTAWA—Statistics on Canadian  
silver production in 1927, finally re-  
vised, as reported by the mining,  
metallurgical and chemical branch of  
the Dominion Bureau of Statistics.  
Give a production of 2,575,698 fine  
ounces, which, valued at the average  
price for the year, 54.27 cents per fine  
ounce was worth \$12,816,677. This  
compared with the 1925 output of  
2,237,924 fine ounces, valued at  
\$12,819,231, when silver averaged  
57.29 cents per fine ounce.

## TWO GET LICENSES TO WED SAME GIRL

Peter-H. Thompson walked up to the  
Marriage license window in the court-  
house and asked for the necessary  
document to permit him to enter into  
life partnership with his cousin,  
Half an hour later Arthur MacLean  
asked for a license, also to wed his  
cousin. The statistician, who was not in  
said, "that something ought to be  
done to keep Arthur MacLean from  
having his money away."

**TOBACCO MAGNATE LEFT**  
**FORTUNE OF \$10,000,000**

**LONDON:**—The tobacco magnate, Sir George Alfred Wills, who died July 11, left a fortune of \$10,000,000. The bulk of the estate goes to his children, but at least four million will go to the government in the shape of duty on inheritance. Sir George was the tenth of his family to leave an estate exceeding a million pounds.

## ROCKYFORD

Miss McLelland, of Calgary, will resume teaching piano lessons at the Maple Leaf Hotel, Saturdays.

Mr. John Kuyten, of Balintire, met with a painful accident last Friday evening, when coming down the hill at the corner south of his farm, his Ford overturned. Mr. Kuyten received three fractured ribs, and was bruised up considerably.

Mr. Harold Legett, of Underwood, Ontario, is here visiting at the home of Mr. and Mrs. Lewis Roppel. Mr. Legett is a brother of Mrs. Roppel.

Mrs. Henry Bull, son Garrett and daughter Marion, Mr. Geo. W. Roppel Sr., Mr. Clifford Roppel and Mr. P. Snyder, all of Underwood, Ontario, are here visiting Mr. and Mrs. Geo. Roppel and other relatives.

Mr. Stewart Treher and Mr. Elmer Tralmer have been here visiting Mr. and Mrs. J. B. McGuire.

Miss Mary Kennedy went to Calgary on Monday, where she will attend St. Mary's School.

Miss Marion Ruppe and Mr. Alden Ruppe have gone to Portland, where they will attend High School.

Mrs. Alfred Kottenbach, Mrs. Ralph Stone, and Mrs. Ambrose Wile were entertained by the Rockyford Ladies Club at the home of Mrs. Kottenbach, August 29th. Mrs. W. A. McKennie read a very interesting paper on Judge H. Lindsay's book "The Revolt of Modern Youth". This was followed by several orthophonic selections. At the close of the afternoon very delightful refreshments were served by the hostesses. The next meeting will be at the home of Mrs. James Black on the date of September 27th.

Mr. and Mrs. James Black have returned to Rockyford after spending a month's holiday at the coast.

Mrs. Herbert Ruppe entertained the High School crowd at an evening party August 24th, honoring Miss Helen Henderson, who has left for Chicago, where she will attend school this year. The following guests were present: Miss Drucilla Brown, Miss Mae Birt, Miss Marjorie Stone, Miss Alice Carpenter, Miss Blanche Fraser, Miss Winnie Dixon, Miss Christie McMillan, Miss Elinor Brown, Messrs. Harvey Birt, Wallis Gibson, Billy Walrod, Duncan Sanger, Russell Bragg, Neil Dixon, Fred Leonard, Hubert Chapman, Mrs. Brown and Mrs. Gibson chaperoned the crowd from Rockyford.

## THE CANADIAN CLUB LUNCHEON

The Canadian Club held a luncheon on the evening of August 30th, at the Rockyford Hotel, the purpose of which was to reorganize, elect new officers for the ensuing year, and make arrangements to send delegates to the Canadian Club Convention being held in Calgary the 5th, 6th and 7th of September. The following officers were re-elected to serve a second term: Mr. J. B. McGuire, President; Mr. W. A. McKennie, Secretary; and Mr. D. H. Howick was elected Vice President.

Following the election of officers, the matter of enlarging the membership was discussed, and for the benefit of the general public, it might be stated that the name Canadian Club does not imply that the membership is limited to Canadian citizens only. Any person residing in the vicinity of Rockyford, who is interested in the welfare of the community, Province or Dominion is eligible to become a member of this Club.

It was decided not to limit the number of delegates to the Convention, but to send any members who were able to attend, to represent the Rockyford Club.

## MUCH NEEDED IMPROVEMENTS

The Village Council are making some very desirable and much needed improvements to the streets. Mr. J. McKinnon with his road building crew have been filling Railway Avenue from Main Street to First Street West, and last Avenue from 1st Street East to 1st Street West. Wooden drains are being installed on both sides of Main Street from Railway Avenue to 1st Avenue, and considerable filling is being done here also.

The lack of proper drainage along the south side of town makes it exceedingly difficult to keep this water cut of the streets, but the new fills will at least keep the travel above the water level.

## ROSEBUD

Mr. and Mrs. Leslie Campbell from Riley, Alta, visited Mr. and Mrs. C. Campbell last week.

Mrs. H. C. Barr was a Calgary visitor Saturday.

L. W. Constock, Philip Constock and Mrs. C. H. Constock spent a few days in Calgary the latter part of the week.

Much sympathy is extended Mrs. Robt. Lees, who lost her father, Mr. Talbot, at Lacouche a short time ago.

Mr. and Mrs. A. Weston and Norman former residents but now of Calgary, spent the holiday in this district.

Mrs. O. N. Gilbert and children, accompanied by Miss Maxine Anderson, left for California by auto. Miss Anderson will attend the University of California at Los Angeles.

Mr. Howard Hyman spent Sunday in Calgary.

**SUPPOSED BETRAYAL OF EDITH CAVELL SENTENCED TO PRISON**

## NAMAKA

The U.P.W.A. have decided to discontinue their regular meetings until the harvest is over.

Mr. and Mrs. McIntosh motored to High River on Sunday.

Mr. and Mrs. W. J. Hare and family visited at the home of Mr. and Mrs. Baker over Sunday.

Nurse Watts left Saturday to spend a week with Mrs. Stevens at Nanaimo.

Miss Merle Baker spent the week at Kailash.

Cutting is general in the district. Mr. Wheeler, Mr. Mateuk and Mr. C. Watts have purchased combines.

Mr. H. Brown sent in a sample of his grain for test, and it graded No. 1.

The Farmers Orchestra of Namaka, will be on the air Saturday, Sept. 8, from 8 to 12 p.m., station C.A.C.F.

An old time dance programme has been arranged.

## ELWOOD

Emil Mateuk is swathing the crop for Bert Henson on Stead's No. 2.

A. H. Tiede is in the hospital with typhoid fever.

Joe, Deamat has a combine cutting today at the first day.

The Blackfoot M. D. has been grading the road west of Colpoys.

The C.P.R. took the samples of H. Henson's wheat for exhibition purposes.

Cutting is general throughout the district. Wheat has been ripening very slow.

been the person who delivered Edith Cavell to the German authorities, was sentenced to two and one half years imprisonment for conducting espionage on behalf of France.

## HORSE GIVING BLOOD TO SAVE HUMAN LIVES

**ROCHESTER, Mich.**—Tess, one of the world's greatest life-savers, observed her 15th birthday at Parkdale Farm here today.

Tess is a mare who has never been hitched to a wagon but who, nevertheless, pulled thousands of lives out of danger. When she was four years old she was added to the herd which is maintained by the Purse-Lewis Research Laboratories to provide serum in the war against disease. It was in May, 1917, that she came to Parkdale and she was immediately assigned to the group producing tetanus antitoxin for the protection of the American soldiers.

In the eleven years she has been on the job Tess has produced 1,023 quarts of tetanus antitoxin, containing 26,362,950 antitoxin units, which amounts to thousands of doses. The soldiers in the war and numerous civilians since then owe their lives to Tess who has enabled them to be protected from the danger of infection from lockjaw.

Although Tess is serving man in a unique way, she is no martyr to science or to humanity. She has always exceeded the life expectancy of the average horse and seldom well content with her lot. She has never been sick or laid off for any reason.

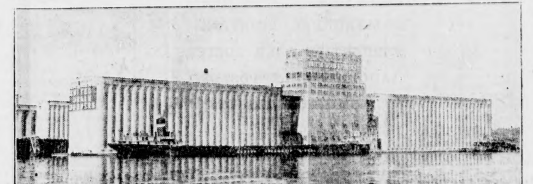

## WOOL CLIP BRINGING VERY SATISFACTORY PRICE

**EDMONTON, Alta.**—Sheep breeders in Alberta, it is confidently anticipated will receive an extremely satisfactory price for their wool clip this year, particularly members of the Alberta Sheep Breeders' Association, affiliated with the Canadian Cooperation Wool Growers' Ltd. It is expected that the season's clip of the members will amount to between 38,000 and 200,000 pounds, which will represent something like 11 or 12 carloads. Last season 10 carloads were sent forward.

## BUSINESS "AS USUAL" DURING AIR JOURNEY

**NEW YORK**—Flying typewriters are the latest in Wall street, in order to test claims of air transport lines that "regular business" could be conducted during air flights. Their official of Billings, Ward & Co., conducted a fair flight to Washington. Two stenographers, Charlie's Price and Edna's Sorenson, neither of whom had been in the air before, took dictation and typed letters during about the entire 2 1/2 hour journey. This work, according to officials of the company, proceeded as efficiently as if the dictation had taken place in an office.

## MAKING A RECORD IN LOADING GRAIN

The capacity with which grain can be handled at a terminal elevator when the best and latest machinery is employed was illustrated the other day at Port Arthur, Ontario, at the new elevator of United Grain Growers Limited. Within a time of seven hours and twenty minutes 250,000 bushels of wheat were loaded into the U.G.G. elevator, breaking all previous records. The fastest time previously made with a cargo of this size has been eight hours and thirty minutes.

The elevator is equipped with four loading spouts, each fourteen inches

in diameter, all of which were set played at the same time. This means that grain is dropped after being weighed at the top of the elevator into four larger scales, each with a capacity of 2,500 bushels. Grain is brought to the scales in four elevating legs from the bottom of the "work house," where it is conveyed on belts from the storage bins. This rate of shipping means over 75,000 bushels per hour, equivalent to loading a carload of grain every minute.

The United Grain Growers' elevator shown in the picture, which was placed in service during the past crop year,

has a capacity of 3,000,000 bushels. New features of design were incorporated in the structure, and it was planned and equipped to provide for the most rapid and efficient method of handling grain. The loading above referred to was accomplished in the ordinary course of business without any special preparations designed for making a record.

The S.R. Le Moyne belongs to the fleet of the Canada Steamship Lines, and is the largest vessel on the Great Lakes. She is 313 feet long, with a beam of 70 feet, while she draws up to 25 feet of water when fully loaded.

# PRINTING -

When your letterheads, cards, envelopes, or other stationery supply runs low you need not worry as it will be easy to have it replenished by merely calling The Standard. When you need circulars, dodgers, or advertising you will find our plant equipped to properly serve you. If it is job printing we can do it.

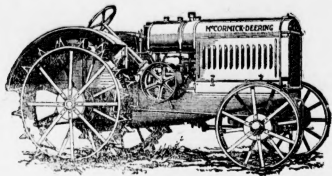

**QUALITY -**  
We pride ourselves on the fine quality of our work.

## POWER FARMING IS Profitable Farming

A tractor operator controls more power, enabling him to do more work in a given length of time than can be done with horses. Field days can be made longer when emergencies arise—the tractor does not tire and the chore is eliminated. You can reduce your overhead and increase your profits by becoming a McCormick-Deering Tractor Farmer NOW.

The Triple Powered McCormick-Deering Tractors are suited to every kind of farm work and are an investment that is well worth your looking into.

**McCormick-Deering 10-20 h.p., 15-30 h.p. Tractors**

### HEARD ON THE STREET

A little fellow left in charge of his tiny brother called out, "Mother, won't you please speak to baby? He's sitting on the flypaper and there's a lot of flies waiting to get on."

Two bachelor girls of somewhat advanced years were discussing the approaching holidays.

"Molly," said the younger, "would a long stocking hold all the other girls' Christmas?"

"No, Evira," said the older girl, "but a pair of socks would."

A little girl, aged three, had been left in the nursery by herself, and her brother arrived to find the door closed. "I wants to tum in, Classy," said Tom.

"But you can't tum in, Tom."

"But I wants to."

"Well, I'm in my nightgown and nurse says little boys mustn't see little girls in their nightgowns."

After an awkward and reflective silence on Tom's side of the door, the miniature Eve announced triumphantly, "You tan tum in now, Tom! I tooked it off."

"I think we'll have to eat out to night, dear."

"Why?"

"I can't find the can opener."

Harry Wilcox, of this city, left for a short business trip to Chicago. The Baptist Church of which he is a member, will hold prayer services to night.

The party who picked up black, white and tan male bound puppy on Cedar Point Road, about 15 mile post, Saturday afternoon, kindly get in touch at once with Jackson's Meat Market.

Little girl (asked to pray for warm weather so that her grandmother's rheumatism might pass away): "O, Lord, please make it hot for grandma."

Lady (learning how to drive): "But can't I have Gene's drums, who instructed me yesterday?"

Garage Proprietor: "No, Madam, He's definitely given up teaching!"

A saxophone sounds funny

When you begin to play:

But after forty lessons:

It sounds worse every day.

Candidate: "How was it that you didn't publish my entire speech?"

Editor: "The typesetter ran short of T's."

Young minister, preaching his first sermon—Yes, friends, I am trying to follow the divine injunction to cast out the sick, heal the dead and raise the devil."

Autonecker: "What would you say if I kissed you?"

Autonecker: "Baby boy, I'm a woman of darn few words."

Cohen: "I think you should be ashamed before Gott to eggspert 59 per cent."

Goldenberg: "But, mein dear Cohen, ven Gott looks down he dinks its only 64 per cent."

Happiness is not the result of external circumstances," said the parson.

"Happiness must come from within."

"In other words," said some, "in other words, alcohol won't do you no good if you tub it on your back."

Nurse: "He seems to be wandering in his mind."

Patience's Wife: "Oh, well, he can't stray far!"

Father was annoyed. His expensive cold watch had failed him. It wouldn't go at all.

"I can't think what's the matter," he complained. "Maybe it needs cleaning."

"Oh, no, daddy," objected four-year-old Henry, "Cause baby and I had it in the bath-room washing it all day yesterday."

A preacher said to his congregation: "There is a certain man among us who is flirting with another man's wife. Unless he puts five dollars in the collection box, his name will be read from the pulpit."

When the collection box came in there were nineteen five dollar bills in it, and a two dollar bill with a note pinned to it, saying: "This is all the cash I have, but will send the other three dollars Wednesday."

A certain bishop was considerably upset when he received this note from the vicar of a village in his diocese:—"My Lord—I regret to inform you of the death of my wife. Can you possibly send me a substitute for the week-end?"

## THE KING EDWARD HOTEL

The place where we want you to feel at home.

We endeavour to please and aim to give  
Service and Courteous Treatment

FRANK MILLER,  
Proprietor

Owner of car (engaging a chauffeur): "Have you a recommendation from your last employer?"

Apprentice for situation: "No, sir; but I can get you a month or two."

"Why the delay?"

"He's in a hospital."

Grandmother says that one reason the girls today are naughty is because they get the shingle in the wrong place.

"These rich people make me sick. What's the use of having money if you don't know how to enjoy it?"

"Well, what's the use of knowing how to enjoy it if you haven't got it?"

"It was a toss-up whether I should play golf or go to the office today."

"Ah, golf won, I suppose!"

"Yes, but I had to toss up 12 times."

An Aberdeen mother rang up the doctor the other day. "Come round to our house at once, doctor!" she pleaded. "One of my children has swallowed a saxepline."

"Right," said the doctor. "How old is it?"

"1892," was the prompt answer.

A school inspector was examining a class of small boys.

"Can an yof tell me what is the meaning of drivers diseases?" he asked.

Two small boys began, in an undertone to compare notes. Presently one of them looked up. "Please, sir, he said, 'it's water on the brain!'"

Mrs. McEllist had been suspicious of her husband for some time. Finally she engaged a private enquiry detective to report to her on his movements. After a few days the sleuth visited Mrs. McEllist. "Your husband met this girl, and they went out to dinner," he explained.

"Was she a blonde or brunette?" inquired Mrs. McEllist, anxiously.

"She was very much of a blonde."

"Thank goodness for that," exclaimed the distressed wife. "At least my husband is still a gentleman."

Wife: "But, my dear, no woman wants to look as though she came out of the Ark."

"Hubby: 'Huh! You women aren't so averse to looking as though you came out of the Garden of Eden, notice.'"

Lost, strayed or stolen—Two pigs from my property at Shadydale. If you've killed the pigs, I would like to have them with fresh meat—Ad. in a West Virginia paper.

The Vicar (to oldest parishioner): "And so you are 90 today, John?"

John (heartily): "I bebat, sir, 90 years today."

"And lived all your life in the village?"

"Not yet, sir."

Bill Wilkinson: "I love to lie on my bed in the morning and press the bell for my valet."

Percy Partridge: "Get along with you—you haven't got a valet."

Bill Wilkinson: "What does that matter? I've got a bell."

"Beale says they put a second mortgage on their place recently."

"Well, one really needs two cars."

"Aren't you ready to go yet?"

"Tell me, doesn't my gown look as if it were slipping off its shoulders?"

"Not let's go."

"Well, you'll have to wait. It's supposed to look that way."

Clipped from a New York City daily: "The President wore the 10-gallon cowboy hat which was given to him in the Black Hills last year, a plaid macinaw coat, khaki breeches, and laced high boots—over a white shirt and a stiff collar and tie."

A certain grocery salesman was proposing to his best girl.

"And, sweetheart," he finished, "I'll lay my whole fortune at your feet."

"It isn't a very big fortune," she

reminded him.

"I know, dear," he replied, "but it'll look awfully big beside your little feet!"

He won.

"Now children, we have heard all about the duties of the senators and congressmen. Johnny, can you tell us the duties of the chaplain?"

"Please, teacher, the chaplain looks the senators all over and then prays for the country."

"I think we should take a walk down the town and see the shops, lassie," said the Aberdonian to his wife.

"But, they're a 'bout," she replied.

"Trye think, didn't I say that?" he said. "I'm no datt a th' gither."

DRIVERLESS TRACTOR PLOWS

—FARMER DOES CHORES

—

LINCOLN, Neb.—Imagine a farmer starting his tractor promptly in the morning, jumping off, doing his chores, taking his milk to town and returning at noon to find his field all nicely plowed—and without the help of a hired man.

It's being done in Nebraska with a newly perfected automatic tractor pilot, use of which is to be extended to the great fields of the wheat belt and to the rice fields of the South.

A year ago, when the pilot was wholly an experiment, people were "interested" in the novelty of the thing. Today it is being put on a manufacturing basis by a midwest factory, and its backers believe it is destined to fill an important place in farm economics.

Frank L. Zybach, formerly a Grand Island garage operator, invented the pilot. Since its test at the University of Nebraska College of Agriculture he has made improvements. The rake is not only possible to use the pilot with a stirring plow, but also with a disc plow.

Usefulness increased

This recently increases the usefulness of the invention, as it can be employed in the wheat fields, according to Mr. Zybach. The attachment also makes it possible to use the pilot in the rice fields of the South, where the little ridges used in irrigation made it impossible to use the pilot with fast disc, shoe, or rubber.

By adding a second behind the first, the pilot can be operated over these ridges.

It was also discovered that a second shoe made it possible to guard against the pilot getting out of the furrow where water had washed out little gullies or made ridges.

Mr. Zybach found that in improving his invention for a disk plow he had simply to shape the rubber somewhat differently so it would follow the disk plow furrow.

In order to have the pilot guide the tractor it is necessary to plow the furrow around the field for the pilot to follow. After that it guides itself. There is an attachment which stops the tractor if the pilot gets out of the furrow.

Has Had Severe Tests

The device has received the most severe tests, according to its backers. In a test on a farm six miles west of Hastings, Neb., a farmer plowed 17 acres in 10 days. Without the pilot he had been able to plow but 6½ acres a day.

It has been used on one farm near Ashland, where the field is three miles around and there are 22 bands in the furrow. Along this field runs a creek with deep banks, but the tractor has followed its pilot and has done each good work that the farmer is going to make use of more pilots.

One of the farmers who is using the device says he starts his plow and then goes to town with the milk. He gets home about noon and fills the tractor with water and oil and lets it run.

When he had threatening to do he put his tractor plow to work and did his thrashing. He also fills his tractor up in the evening and lets it run until midnight.

### THE SETTLEMENT OF ALBERTA

#### NATURAL RESOURCES

The negotiations between the Dominion Government and the Province of Manitoba suggests the payment to the Province of a cash subsidy, estimated upon a basis of the revenue the Province might have drawn from natural resources since 1870, a date when little of their resources had been alienated.

The Province of Alberta was formed in 1905, a date when a large amount of the land, minerals and other resources had been disposed in land grants to the railways and in many other ways.

The Province of Alberta would be very unfairly treated if the Dominion Government should not be prepared to recompense the Province of Alberta from a much earlier date than 1905, if they are to be treated fairly.

The land in this province granted to the railways, was to assist them in building railways, part of which were beyond the limits of the province. The compensation should cover all land and minerals, which have been alienated at a fair valuation together with interest from that time, less cost of carrying on the work done by the Dominion officials. The Alberta Government representatives will need to match their every claim on the part of the eastern people take the laudable view that they are entitled to a share in the land values of the Prairie Provinces, and they have nursed this idea so long that they now believe it, which is the sad part of their hibernation. The province of British Columbia is fairly well off. It has had a subsidy of \$100,000 a year for about forty years from the Dominion cash box, it has had taxes upon the developed mineral and timber resources, and now it is to get back its lands, granted for railway purposes, which are to be exchanged with the Dominion for Alberta land, which should assist Alberta materially in making their claims to the Federal Government.

### CABINET MINISTERS

#### SEEM TO BE ENJOYING LIFE

The Prime Minister of Canada has just left for Geneva. The Minister of Railways is also headed for Europe, if not there. The Minister of Finance has just returned from Ireland. Last week the Minister of Agriculture traded a trip to his native land. The Minister of Commerce was also in the capital of the Empire last year. Possibly further reflection would add to the list of ministerial jaunts. But that is enough to remember just how busy, indeed, it is, if anything, almost too busy.

There can be no objection to our Cabinet Ministers travelling and seeing the world. For many reasons, it is a good thing that they do so. Travel is an educative influence. It broadens the mind and calms the unbalanced. It is possible that the late Cabinet Ministers stand in need of the educative, broadening, and enlightening influence of travel. It is said that one of the factors that made Ramsey MacDonald the efficient foreign Minister he became during the Labor Party's brief tenure of office was his habit of foreign travel practised during many years. The British ex-Prime Minister's travelling, however, was at his own expense.

The jaunts of Canada's Ministers appear to be taken when they are burdened with the weight and cares of office and at

their country's expense.

Canada has a High Commissioner in London, an Ambassador in Paris, Trade Representatives everywhere. It would appear that Mr. Laurier or Mr. Roy would be quite capable of signing the Kellogg Treaty against war in Canada's behalf. Their signatures would be quite as binding on Canada if duly authorized to sign. Mr. King, if they are incapable of doing such things for Canada which are not fit representatives on the few occasions when we require to be represented.

The next thing we shall hear of is a trip by Mr. King to Japan to inspect the drains of the proposed new legation there, while Mr. Robb may take a run over to Singapore to see if there are any chances of negotiating a preferential tariff on Siamese teak, and Mr. Malcolm will likely feel it within his duty to take a trip to Lapland (in the summer time) to see if he can work up a trade in maple syrup. The taking of holidays by Cabinet Ministers is not to be objected to but it might be more fitting if they did their jaunts a la Ramsey MacDonald, that is, at their own expense and when they give out of office.

### POLICEMEN WHO GET TOO FREE WITH FIREARMS

If one is going to get killed it does not matter much difference whether one is shot by a bandit or a policeman. The effect is the same in both cases. The bandit, however, if caught, may be punished; the policeman is usually held sacrosanct. A Toronto policeman has just added glory to the police force of that city by shooting one of his citizens, the poor fellow afterwards dying. The Attorney General, Mr. Price, says that action will be taken against the policeman. The Chief of Police of Toronto, General Draper, appears to justify the shooting on the ground that the policeman who did the shooting was merely in the army and is a good shot. Which is poor consolation for the victim and his relatives.

It is an amusing thing that Toronto which is so loyal to the Motherland does not imitate her in the question of arming the police. In Britain no policeman goes armed, except with his truncheon. Consequently, no law-breakers or innocent citizens are killed by them. If anybody is to be killed in the old country they keep a public executioner for the purpose. And he is only killed after being proven guilty of murder. Now, if the policeman who arrests a murderer is entitled to kill him over there.

But in Toronto a man whose crime appears to have consisted of talking from an automobile to a girl on the sidewalk was shot and is now dead. What a tragedy! And what a comment on the efficiency of the police if they cannot deal with such trivial offences against the law, if offence was done without having recourse to arms. Toronto is not alone in this killing habit. A young bandit who stole a couple of hundred dollars from a man in Montreal recently, shot his first crime—was shot and killed as he ran away, a Montreal policeman being the executioner. In the same city a year ago another cop shot and killed a valuable horse which had run away—probably from the cop. Truly, as Burns said, it is the sight of mankind to do ill deeds that makes ill deeds done.

There is this lesson to be learnt by our authorities in Canada. The arm of policeman has as its natural sequence the arming of criminals. No determined criminal will go unarmed

### WORLD-WIDE INCREASE

FORESEEN IN AUCTION

— — —

Due to a general increase in sheep stocks throughout the world many producers are beginning to wonder just how long the present expansion period with its high prices will last. From 1922 until the present year there has been an increase in the world's wool production of 15 per cent, but this has only brought the output up to about that which prevailed before the war in most of the leading sheep countries.

Australia Leads

Australia, which is the leading sheep country and which supplies one-quarter of the world's wool supply, is not up to that of a few years ago. Of course, the modern sheep, in the big range areas where the animals are raised, produce far more, yields a much bigger clip than the one of a few decades back.

The average fleece in Australia today, due to marvellous improvement in breeding stock, weighs eight and a half pounds compared with four pounds thirty years ago. On the other hand, in many countries where the bulk of the animals are kept on mixed farms, there has been a tendency to substitute mutton sheep for the heavy wool bearers. There has, too, been an increase in wool consumption due to a greater world population, the gradual industrialization of the Orient where the people are turning more to Western clothes, and also to the steady economic recovery of European countries in the few years, according to a summary from the United States Department of Agriculture.

— — —

### READ THE WANT ADS.

### RAISES GAME BIRDS

WITH INCUBATORS

— — —

MARSHFIELD, Mass.—To L. B. Sherman, Manager of the state game farm at Marshfield goes the distinction of being the first man to successfully raise game birds, partridge and pheasants, by the incubator method.

Sherman has thus far this season raised more than five thousand pheasants in the twelve incubators at the farm. He prefers incubators to setting hens, and will use no other method. English and Scotch game-keepers had for years regarded the hatching of game birds in incubators as impossible. They contended that the absence of the mother bird would leave the young birds helpless to break out of the shells.

Sherman has disproved this theory and in addition to the five thousand healthy chicks now on the farm he has a like number of eggs in the incubators. The breeding stock at the farm consists of approximately four hundred pheasants. During the laying season an average of 250 eggs are obtained daily and these all go into the incubators. The laying season starts the first of April and ends in July.

## Slats' Diary

BY ROSS FARQUHAR

Friday—Ma & Pa is on the outside after a few days of peace. It all happened tonight when they were a arguing as to what Pa had done for humanity and manhood, and well, what did you do for the benefit of your fellow men and Pa answered and said, "I spoke twice to him. There ain't been many words' spoke since then."

Saturday—I saw Aggie and her girl friend today as I was going over to town for mail. I spoke twice to her. She guesses she didn't see me as she talked to another. I am going to get even with that girl yet.  
Sunday—Ma & Pa including me went out to my uncle's farm in the country today and it fried chickens after dinner was over. I didn't see a girl as I layed down my quilt. I heard my uncle say something to an Hester about a dumped pig but I didn't see any pig running around here.  
Monday—it turned cool again to day so maybe me and Vin may not take our best trip down the ditch after all.

Tuesday—Ma was criticizing Pa to me for his lack of politeness when we was at Hester's pitcher show, and how how you didn't get up out of your seat when that lady tried to get thru, Pa just laffed and said he had time. I did that the lady returned into my seat & I had to look for a mother.

Wednesday & sister Gillen was looking politics again tonight. Pa said, Gillen what this year country really needs is a pig five a cigar. Mr. Gillen says, you know that the year country really needs is a good steer, sister, I that will work.

Thursday—Pa was reading the Standard tonight and it said that sum part had fatted at a full line in Spain. Pa laffed and said our guts don't seem to be too much they used to be here for the 2nd time in a evening Ma giving him an offal black luk.

## PASTOR EXPERT PERFORMER ON TIGHT ROPE

—  
DEB MOINES, Iowa—"The 'secret' to long, healthy and happy life is really no secret at all, believes the Rev. Dr. William Christ, Strathmore, Iowa. Methodist minister who at 82 can still walk a slack rope and 'kick' your hat off."  
The formula has been proclaimed to the world for more than 2000 years and may be read by all devout, in the Bible, declares Dr. Smith.  
Following are the biblical formulas cited:  
"Fear, O my son and receive my sayings, and the years of thy life shall be many." Prov. 2, 7.  
"What man is he that desareth life, and loveth many days that he may see good? Keep thy tongue from evil, and thy lips from speaking guile. Depart from evil and do good; seek peace and pursue it." Ps. 34, 12-13.  
Besides his faith in scripture prescriptions, Dr. Smith attributes no small part of his longevity and in every way a splendid testimony."  
Dr. Smith was born on a farm in Ohio, next to the youngest of nine children. When he was 10 years old the family settled on a farm in Warren county, Iowa. His father's death, when he was 15 years old, forced him to take charge of the farm.  
Getting his schooling "between farm chores." Dr. Smith was not only a practical farmer at 25 but he was a graduate of Simpson college, Indianola, Iowa.  
While attending Simpson in 1895, he did not have the advantage of a gymnasium. For exercise he took up slack rope walking, stretching a rope between two trees at his boarding house. He has never lost the agility he acquired through this recreation and two years ago entertained delegates to a Christian Endeavor convention with feats on both slack and tight ropes.

## I Forgot

To pay my subscription to the Standard; that's the explanation we often get when subscribers eventually discover that they are in arrears. The amount is small, but in the aggregate totals an amount that can always be used in a publishing office.  
Look up your label and see if you have "Forgot".  
THANK YOU.
